## Universal Install GUIDE

For full and partial replacement grilles

We recommend professional help when installing.

- 1- Remove the factory Grille shell
- 2- If your grille is a partial replacement cutting the OEM Grille will be required  
(Always trim small amounts at a time).
- 3- Attach the adjustable mounts to the OKF grille

- 4- leaving the mounts loose  
Install the OKF grille to the truck.  
(Adjustment will be required)
- 5- When fitment is achieved,  
Tighten all the mounting hardware.
- 6- leave at least an 1/8 around the grille  
replacement.
